EDUCATION

Indian Institute of Science Education and Research Kolkata

Master of Science in Geological Sciences

Kolkata, WB

Aug. 2021 – July 2022

Indian Institute of Science Education and Research Kolkata

Bachelor of Science in Geological Sciences, Minor in Physics

Kolkata, WB

Aug. 2017 – May 2021

EXPERIENCE

Machine Learning Engineer

Kloudspot

March 2025 – Present

Bangalore, KA

- Optimized vLLM and SGLang frameworks with EAGLE-3 speculative decoding, including training the draft model to reach an acceptance rate of 80% of generated tokens, resulting in up to $2\times$ higher throughput and $2.7\text{--}3.5\times$ lower latency in production.
- Deployed and optimized multiple LLMs on RTX-4090 GPUs, improving scalability to handle high-concurrency workloads with lower latency.
- Conducted experiments and benchmarked multiple LLM inference acceleration techniques like speculative decoding, look-ahead decoding, medusa, Eagle-1/2/3 etc.
- Instruction finetuned multiple Open-source LLMs such as Llama 3.1, Deepseek, Qwen for advanced reasoning tasks and instruction alignments.
- Enhanced LISA AI with advanced generative AI features and built an MCP client for seamless integration with enterprise data sources and tools.

Associate Data Scientist

Celebal Technologies

Nov. 2023 – Feb 2025

Jaipur, RJ

- Designed a hybrid VLM inference system, deploying a quantized finetuned model on edge and full-scale finetuned on cloud. Built a real-time video analytics pipeline with adaptive edge-cloud switching. Developed data prep, tagging, and retraining modules, achieving 77.9% mAP for the usecase. (YOLO11, QLoRA, PyTorch, SmolVLM)
- Modeled and optimized predictive algorithms (ARIMA & SARIMA) and machine learning algorithms (XGBoost, LightGBM, CatBoost, K Means) for predictive analytics in energy demand forecasting, achieving a 75.2% R^2 score for electricity load detection.
- Worked on an on-premise OCR solution using open-source models and fine-tuning them for specific use cases. (Microsoft Table Transformers, Tesseract OCR, Layout Parser, Detectron2, ONNX Runtime)

Data Science Intern

Celebal Technologies

June 2023 – Oct. 2023

Jaipur, RJ

- Led the design and deployment of AI-powered solutions, leveraging Azure OpenAI and document intelligence to extract, embed, and index structured/unstructured data, achieving a 15% improvement in BLEU Score and 10% boost in semantic similarity.
- Implemented enterprise-grade security with Azure AD Authentication, APIM, and versioning, ensuring robust compliance for AI and data science solutions.

Graduate Research Student

IISER Kolkata - Environmental Nanoscience Lab

May 2021 – July 2022

Kolkata, WB

- Quantified As/Mn in estuarine compartments, exceeding WHO limits (0.01 mg/L As, 0.05 mg/L Mn) using statistical modeling.
- Evaluated soil/sediment toxicity and surface-groundwater interactions with risk indices and correlation analysis.

TECHNICAL SKILLS

Languages: Python, C, C++

GPU programming: Cuda, cuBLAS, cuDNN, CUTLASS, Triton

Libraries: Pandas, NumPy, Matplotlib, Transformers, OpenCV, PEFT, PySpark

Frameworks: PyTorch, TensorFlow, Langchain, LlamaIndex, Celery, gRPC, Flask, FastAPI

Technologies: Git, Docker, Databricks, Azure Cloud, Selenium, WebSockets
